

FoCaS Expedition

FORESTRY AND CLIMATE SCIENCE EXCHANGE PROGRAM

Overview

FoCaS is an international exchange program prioritizing sustainable forest management, biodiversity conservation, and developing resilience against climate change.

Locations

- University of New Hampshire
- Jackson Marine Laboratory
- Shoals Marine Laboratory
- Mount Washington State Park
- NH State House
- Washington DC
- Washington Parks and People
- U.S. National Arboretum
- The Smithsonian Museum
- U.S. Botanical Garden

Learned Outcomes

- Effective and sustainable system of natural resource management
- Significant capacity building and usage of modern technologies.
- Develop exclusive ideas and applications in management systems.
- Inclusiveness in terms of people and nature is significantly essential.
- Significance of the integrated dataset management systems.
